Coimbatore, India
priyachaudhari040@gmail.com
(+91) 8235387049

AI & Data Science engineer with hands-on experience building agentic AI systems, RAG pipelines, and full-stack MERN applications, including production-style projects supporting 100+ concurrent users. Skilled in Python, C++, JavaScript, LangChain, and cloud/DevOps (Azure, Docker, CI/CD). Proven track record across 2 internships and hackathon wins (TNWISE, Freshathon), applying AI and software engineering to autonomous systems, embedded devices, and scalable web platforms.

EDUCATION

B.Tech Artificial Intelligence & Data Science <i>Sri Eshwar College of Engineering</i>	CGPA: 8.77/10	Coimbatore, India 2024 – present (5 th sem running)
School Leaving Certificate <i>Everest English Boarding School</i>	CGPA: 3.52/4	Butwal, Nepal 2021 – 2023

TECHNICAL SKILLS

Programming: C . C++ . Java . Python . HTML . CSS Javascript . SQL	Frameworks: MERN . React . Node.js
CS Fundamentals: DSA . OOP . DBMS . OS	Data & AI: Big Data . Deep Learning . TensorFlow . NLP
Cloud & DevOps: GitHub Actions (CI/CD) . Azure	GenAI: LangChain . RAG . Vector Databases • AI Agents
Developer Tools: Git . VS Code . Overleaf (LaTeX) Postman . Docker	Soft Skills: Problem Solving . Communication . Planning . Adaptability . Active Listening

INTERNSHIP EXPERIENCES

Agentic AI Developer – Aptitude Guru – Remote	2026
- Built AI-powered agents using LLMs and RAG workflows, automating manual task cycles. - Integrated 4+ external APIs (OpenAI, Slack, Twilio) to enable autonomous decision-making.	
Software Engineering Intern – AlgoTutor – Remote	2025
- Engineered a real-time MERN chat application supporting 100+ concurrent users with low-latency messaging. - Implemented WebSocket-based messaging and optimized database queries, reducing response time by 30%.	

KEY PROJECTS

AI-Enabled Smart Vehicle Emergency Response System Tech Stack: Python . OpenCV . CARLA Simulator . ESP32	GitHub Demo
- Architected an AI driver-emergency detection system with real-time V2V workflows. - Validated response scenarios using CARLA Simulator to ensure system accuracy. - Led the end-to-end development of the GuardianDrive project.	
Blood Donation Management System Tech Stack: MongoDB . Express . React . Node.js . Tailwind	GitHub
- Built a full-stack MERN platform featuring secure 5-tier role-based access control. - Integrated Leaflet.js for GPS donor tracking and automated PDF certification.	
Autonomous Robot System Tech Stack: ESP32 . Arduino . C/C++ . Sensors	GitHub Prototype
- Designed an ESP32 autonomous robot with ultrasonic sensors for obstacle avoidance. - Engineered responsive motor control logic and Bluetooth-enabled manual override.	

ACHIEVEMENTS & CERTIFICATIONS

2nd Prize – TNWISE Hackathon: Organized by the Government of Tamil Nadu. 2nd Prize – Freshathon: Designed and built an AI-powered autonomous robot. Oracle Java Foundations Badge: Certified in Java fundamentals and object-oriented programming concepts. 3rd Position – SkillRack: Recognized as a top performer in competitive programming challenges. MERN Stack Internship Completion: Gained hands-on experience in full-stack web application development.

CODING PROFILES

LeetCode – Max Rating: 1544+ Top: 33.6% Rank: 175,572 Profile: Profile Link
